Letter of Recommendation

This Letter of Recommendation is specifically tailored for university admissions purposes and addresses the applicant's academic achievements, character, and suitability for higher education.

This is a letter of recommendation for Disha Parmar. I have been Disha's reporting manager during her internship. Disha and I collaborated at TSS Consultancy Pvt. Ltd., within the Engineering department, where I closely monitored and oversaw all her projects.

Disha's ability to adapt and learn quickly is evident from her journey during the internship. Initially facing challenges, she actively sought guidance from me and demonstrated a strong learning attitude. She has shown remarkable progress in using technologies and mastering tools relevant to her projects, which shows her dedication and determination. She is always willing to lend a helping hand to her teammates. Her ability to organize workflow efficiently and effectively, prioritize tasks, and maintain quality standards while ensuring timely completion of projects is truly commendable.

Throughout her professional endeavours, Disha has maintained excellent social relations with her colleagues and managers. She is highly motivated and dedicated to her work, consistently striving for excellence in everything she does. Despite her focus on detail-oriented tasks, she never loses sight of project deadlines and milestones.

As part of a collaborative research team, Disha Parmar was consistently impressed with her talent for building algorithms and models. During our year-long exploration of natural language processing (NLP) applications, Disha spearheaded the development of sentiment analysis techniques. Her approach to using various methods allowed us to extract valuable customer insights from massive volumes of data. Disha's talent for building algorithms and models, combined with her collaborative spirit, made her a vital asset to the team's success.

Disha has extensively utilized pre-trained models for extracting vital information from regulatory documents like SEBI filings and FIR reports. This approach has significantly strengthened our ability to derive actionable insights and make informed decisions based on regulatory data.

In conclusion, I am confident in Disha's abilities and potential for growth. I am confident that she will excel in any endeavour she chooses to pursue, including her aspirations for pursuing further education. Therefore, I highly recommend Disha Parmar as a worthy candidate for any future opportunities she may seek.

Sincerely,

Kshitij Agrawal
